Transforming African Agricultural Systems Through Sustainable Intensification: Project Design Workshops

As part of the U.S. Government's Feed the Future initiative to address global hunger and food security issues in sub-Saharan Africa, the U.S. Agency for International Development (USAID) is supporting three multi-stakeholder agricultural research projects to sustainably intensify key African farming systems. Based in three priority agro-ecological zones, the three projects are focused on sites in Ghana and Mali, Ethiopia and Tanzania.

The regions were chosen based on analysis of cropping systems, poverty, population, country development priorities, and the potential for successfully improving agricultural productivity.
